**SBA** 8(a) Certified

## CYBER SECURITY

*Alaska Native Corporation | Small Disadvantaged Business*

Cybersecurity threats take many forms – terrorists, enemy states, rogue actors, and employees. The list grows at viral speed. The persistence and technical complexity of threats grows at the same staggering pace. Staying ahead requires an in-depth understanding of evolving technologies, constant vigilance, continuous monitoring and comprehensive response.

Sugpiat Group understands that Cyber Security is more than IT security, vulnerability assessments and threat mitigation. This is a business concern requiring a persistent effort and culture to align people, processes, tools, and technology.

We don't just block attacks from internal and external threats. We determine the source, methods, and targets, then we adapt defenses while ensuring our clients' assets are protected from future attacks.

Our certified experts analyze the enterprise infrastructure making recommendations for immediate security strengthening configurations. Our insight into the infrastructure enables us to deny, disrupt and degrade attempts that would compromise our client's business operations, reputation, and safety.

We focus on proactive measures while implementing comprehensive monitoring and rapid response to cyber threats.
